Product Improvement

Waukegan, IL — A. L. Hansen Mfg. Co. announces improvements made to its Jet Rack ladder racking system. The Jet Rack allows you to easily store and remove your ladder in just seconds. Specifically designed to eliminate the daily problems associated with ladder storage, the Jet Rack stores your ladders in the most unused space of your vehicles, the ceiling and/or walls. The Jet Rack saves endless hours of time and money simply by keeping your ladder out of the way, clean, and instantly accessible at all times. The new enhancements along with its pricing make the Jet Rack ladder racking system the easiest and most economical solution to everyone's ladder storage needs. The following enhancements are included on all Jet Racks currently shipping.

- **Slack Control Clips:** Each kit now includes two slack control clips used to hold the shock cords closer to the rail.
- **Re-Design & Color to the receiving pin:** The pin now has a raised end replacing the orange cap for increased retention and is now yellow in color for greater visibility.
- **Aluminum Castings:** We have changed the material for the castings from Zinc to Aluminum to help reduce payload and keep fuel costs low.
